List of our members	25
Thank you from the association	27

## Welcome

A very warm welcome to our Tea Grown in Europe Association. With this leaflet, we would like to take you on a little tour and show you our ongoing tea-growing and tea-making projects. Some of these journeys are just beginning and very small-scale; others are several years old. Our gardens come in all shapes and sizes and are already producing some beautiful and tasty teas. Together, we aspire to produce high-quality, single-estate teas across Europe. As an association, we share our experiences and knowledge between producers and with tea experts, aiming to produce the best teas and to settle a new agricultural sector.

Please get in touch with us if you would like to join the association or talk with tea producers in your area to plan a visit and taste what European teas have to offer. We look forward to meeting you.

Best tea wishes from the President

Lucas Ben-Moura

# About the association

Over the last 150 years, there have been a number of experiments in Europe with growing the *Camellia sinensis* plant and making tea from it. Early experiments can be found in France and Portugal. Tea plants across the world grow under diverse geographic and climatic conditions, and at least parts of Europe are potentially suitable for tea growing.

As an association, we want to take this further and promote the growing of tea as an economic activity. Since 2016, the association has continued to grow rapidly and includes a large number of projects and members.

The main aims of the association are:

- To support its members in developing know-how in growing, harvesting and processing techniques
- To utilise the best practices for environment-friendly cultivation, harvesting, and processing
- To develop environment-friendly tourism on the sites where tea is cultivated
- For members to obtain National or European recognition labels (such as the French “AOC” or the European “PDO”)
- To protect vital botanic varieties relevant to the cultivation of tea in Europe, collected by the members

Current President: Lucas Ben-Moura

Former President: Tobias Denzler

Secretary General: Étienne Monin

Treasurer: Mylene Dupuy

Past Presidents: Monica Griesbaum (2021) and Denis Mazerolle (2016–2020)

The association is composed of three types of members:

- Active members are directly involved in the domain covered by the association and contribute actively to its actions
- Subscribing members support the objectives of the association without contributing directly to its actions; they are involved in the decision process
- Honorary members are individuals acknowledged in the sector of tea

New members are very welcome. Application details can be found on our Website. For more information, <http://tea-grown-in-europe.eu>.

# The Azores

## Agrarian Development Services of São Miguel

Clara Estrela Rego and Cecília Franco

tea makers

In the late 1980s, the Agrarian Development Services of São Miguel (S.D.A.S.M.) initiated the study of the adaptation of the *Camellia sinensis* var. *assamica* on the Azores, Portugal. Two small plantations, with a combined area of roughly 1 acre (0.4 ha), are located on land owned by the Azores Regional Government. The plantation is maintained without the use of synthetic fertilisers or pesticides.

### What teas do you make, and where can your tea be tried or purchased?

We specialise in white tea. The tea is dried in a dehydrator using solar energy. The distinctive weather conditions of the Azores also contribute to the tea's unique characteristics. Teas can be tried on-site.

### Is the garden open for visits?

Yes, please contact us to schedule your visit. We offer guided tours.

Temperature range: 4.9 to 28°C

Growing season: March to November

Altitude: 263 m

Humidity: 83%

Average annual rainfall: 1 600 mm

## Filleule des Fées

Denis and Weizi Mazerolle

*tea makers*

Filleule des Fées is nestled in the gentle slopes of the Blavet River, a green link between Brittany's austere hinterland and the cheery bays of its south coast. The tea garden is sheltered from the sea winds and often embedded in a favorable mist. The garden includes a diversity of tea bushes, obtained from cuttings taken from ancestral tea bushes acclimated to Brittany for over a century and from far-east cultivars and bushes obtained from our own seed garden.

### What teas do you make, and where can your tea be tried or purchased?

We specialise in green and black (red) tea. Our tea is finely plucked by hand, processed with traditional machines, and organically certified. Our tea is sold in limited quantities through our website or directly at our tea garden during public events.

### Is the garden open for visits?

Yes, only during fixed times. Please see our website to schedule your visit.

Temperature range: -2.7 to 23.1°C

Growing season: April to October

Altitude: 15 to 20 m

Humidity: 70%

Average annual rainfall: 950 mm

## Galan, Hautes-Pyrénées

Étienne Monin

*tea maker*

Gazing at the majestic Pyrénées mountain range, my tea garden is located on a wooded hillside surrounded by oak and chestnut trees nurtured by the mist and the rain, making it a suitable natural environment. The tea garden is planned to cover 2.47 acres (1 ha) as part of a professional project starting in 2023 to experiment with and produce high-quality tea, further aiming to demonstrate the potential of Pyrenean teas.

### **What teas do you make, and where can your tea be tried or purchased?**

Tea obtained from mature plants will only be available in a few years and various tea processing methods will be tested.

### **Is the garden open for visits?**

Tea tours and visits will be starting in 2024. Please do not hesitate to contact me if you are interested.

Temperature range: -10 to 39°C

Growing season: April to October

Altitude: 400 m

Humidity: 70 to 80%

Average annual rainfall: 900 mm

## Jardins de thé

**Gaëlle Rousseau**

*tea maker*

Jardins de thé invites you to discover the first tea plantation in Normandy by the sea near Deauville, located on an 18th-century farm. The objective of the project is to raise consumer awareness of tea. We wish to grow and process tea with respect for the environment.

### **What teas do you make, and where can your tea be tried or purchased?**

Jardins de thé produces white and green tea, as well as herbal tea. They are available on our website and may be purchased at the garden.

### **Is the garden open for visits?**

You can visit the garden, taste our tea, and get advice on buying tea plants and seeds. Please visit our Website for more information.

Temperature range: 8 to 22°C

Growing season: May to September

Altitude: 110 m

Humidity: 88%

Average annual rainfall: 782 mm

## L'Aventure Oolong

**Jakez Hubert**  
*tea maker*

We are developing the manufacturing process for oolong tea from Brittany in partnership with the magnificent "Filleule des Fées" tea garden. We are also developing our tea garden of about 2,500 tea plants following an agroforestry approach within a biodiversity-rich territory. Long and meticulous research and experimentation have made it possible to fully understand this complex traditional know-how from China and Taiwan and adapt it to our region. We use oolong cultivars, but we also like to discover new ones.

### **What teas do you make, and where can your tea be tried or purchased?**

We specialise in oolong tea (floral, roasted, and red). Our oolong tea is made in small quantities, depending on the season. Our teas may be purchased from the "Filleule des Fées" tea garden or other retailers.

### **Is the garden open for visits?**

Not at this time, but we hope to offer training on how to make oolong tea soon.

Temperature range: -2.7 to 23.1°C  
Growing season: June to September  
Altitude: 44 to 70 m  
Humidity: 70%  
Average annual rainfall: 1100 mm

---

29300 Guiligomarc'h, Brittany, France  
Instagram: @laventure\_oolong

A photograph showing two men in a lush green field. One man, wearing a maroon t-shirt and glasses, is kneeling and tending to a tea plant. The other man, wearing a white t-shirt, a black cap, and cargo pants, is standing and also working on the plants. The field is filled with many similar tea plants, and the background shows more greenery and a line of trees.

# France

## Les Landes Vivantes

Thomas Bernardi

tea maker

Welcome to Les Landes Vivantes, in Treffieux! Our open and biodiverse garden is located in the moors, next to a large pond. It is 45 kilometres north of the city of Nantes, which has been the host city for *Camellia japonica* (Japanese Camellia) for more than 200 years. Given the success of other *Camellia* species in the surrounding area, we hope to create a prosperous *Camellia sinensis* garden here. The garden was started in 2017, and we planted the first tea plants in 2018. We currently have 5,000 plants and aim to reach 7,000 over the next two years.

### What teas do you make, and where can your tea be tried or purchased?

We have been making black (red) tea and experimenting with white and green tea processing since 2021. We want to produce organic, handmade tea that highlights the unique landscape of the west side of France.

### Is the garden open for visits?

Yes, from May to October, please contact us to schedule your visit.

Temperature range: -8 to 38°C

Growing season: April to October

Altitude: 30 m

Average annual rainfall: 800 mm

## Les Trouveurs Agricultural Company

**Svetlana Fernandez**

*tea maker*

In 2018, Les Trouveurs Agricultural Company started working on its first experimental field of medicinal and aromatic plants grown in acidic soils in the Occitania region. The field is certified organic, and repeated trials and innovative agricultural practices were required to select the most viable varieties and cultivars, given the specificity of the climate conditions. The project is part of the "Regenerative Agriculture" program that takes place in locations of mineral water production and is located on the territory of the Haut Languedoc Natural Park.

### **What teas do you make, and where can your tea be tried or purchased?**

We have several rows of *Camellia sinensis* cultivars that survived the fairly extreme conditions of the Occitan mid-mountains. We hope to experiment with various processing methods.

### **Is the garden open for visits?**

Visits are welcome on request. Our discovery farm for the acidic soils of the mid-mountains will be open to the public in 2024.

Temperature range: -14 to 32°C

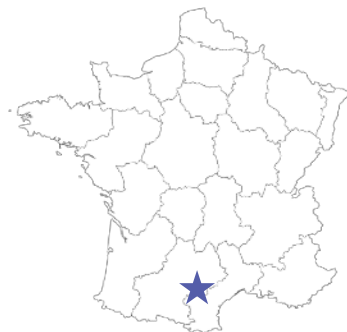

Growing season: April to September

Altitude: 700 m

Average annual rainfall: 1000 mm

---

## Lydia Gautier

Lydia Gautier  
*tea maker*

Lydia Gautier is an agronomist and has been an international consultant for over 25 years in pure origin sourcing, blend creation, sensory analysis, and professional training. She is the author of a dozen books on this subject. She is the founder and director of the eponymous brand Lydia GautierThés & Tisanes, offering 100% natural creations with teas and herbals, directly sourced pure origins, and a gastronomic approach. Her adventure as a tea producer is in its infancy; she launched tests on a family plot in France in the Corrèze département on the foothills of the Massif Central in 2016, with a second planting in 2022 and a next one planned for 2023.

Temperature range: +3 to 28°C

Altitude: 200 m

Humidity: 80%

Average annual rainfall: 1189 mm

## Mendikotea

Mylene Dupuy  
*tea maker*

My garden is lost in the depths of the Basque Country, in Soule, in the southwest of France. It is located on a northwest-facing plot with acidic soil and high humidity, where winters can be harsh. It is made up of 4,000 baby plants, which I hope will, in three years, produce a tea with character in the image of the soil on which they grow!

### What teas do you make, and where can your tea be tried or purchased?

For the moment, I do not know what type of tea I will be able to make. My dream would be steamed green tea, but the tea plant will have the last word!

### Is the garden open for visits?

Yes, the garden is open for visits. Please get in touch with me via Instagram.

Temperature range: 6 to 22°C

Growing season: April to October

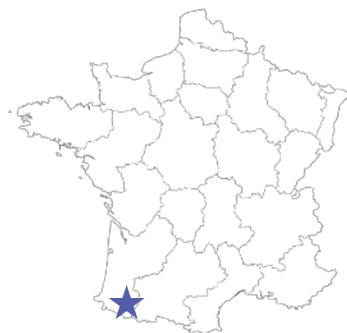

Altitude: 600 m

Humidity: 80%

Average annual rainfall: 1100 mm

---

## Terrasses de l'Arrieulat

Lucas and Sybil Ben-Moura

*tea makers*

In 2018, after Lucas went to work on tea plantations during his studies as an agronomic engineer, he came back and planted with his family a tea garden in the Pyrénées, just south of Lourdes. Since 2020, we have planted several cultivars from cuttings and seedlings from Brittany, Italy, Nepal, and China. We hope to plant 2.47 acres (1 ha) of tea plants focusing on agroforestry and chemical-free practices.

### What teas do you make, and where can your tea be tried or purchased?

We are focusing on a white tea dried at room temperature without sunlight and experimenting with different types of white tea and roasted black tea.

### Is the garden open for visits?

Starting in June 2023, the garden will be open for visits. Teas may be tasted during on-site visits. You can contact us to organise that.

Temperature range: -12 to 45°C

Growing season: late March to late October

Altitude: 550 m

Humidity: 30 to 100%

Average annual rainfall: 1000 mm

---

## Tschanara Teagarden

Haeng Ok Kim and Wolfgang Bucher  
*tea makers*

Established in 1999, the Tschanara Teagarden is situated on a shielded hillside in Odenthal-Scheuren, in the middle of the Bergische Land, Germany. Tschanara translates to “tea-land” in Korean. We have been experimenting with growing and processing 99% generative cultivars in our tea field and various unique species in our greenhouse (e.g. *C. sinensis* var. *pubilimba*, *C. sinensis* var. *assamica*, *C. kwangsiensis*, *C. pubescens*, *C. taliensis*, and *C. ptilophylla*).

### What teas do you make, and where can your tea be tried or purchased?

We specialise in white, yellow, green, oolong, black (red), and dark tea. We currently do not sell our tea, but some are available during select tasting events or on request.

### Is the garden open for visits?

Yes, please contact us to schedule your visit. Additionally, we offer tea garden tours and tea seminars focused on green tea, both with tea tastings.

Temperature range: -13 to 38°C

Growing season: May to September

Altitude: 213 m

Average annual rainfall: > 900 mm

---

Wirtsspezard 14, 51519, Odenthal-Scheuren, Germany

## Wudang Daoist Tea Garden

Wenzhuo Liu

*tea maker*

Our tea garden is located in Germany's Leine Uplands Steinberg, facing Wispe, a branch of the Leine River, and is adjacent to Seven Hills. There are ancient springs (Apensteichquelle), the historical ceramic production town of Duingen, and stoneware clay pits nearby. Our tea garden is a comprehensive tea garden with production experience, science and culture education, and ecological sustainability with fruit and vegetable planting and livestock.

### What teas do you make, and where can your tea be tried or purchased?

We specialise in green, yellow, black, dark and scented tea. We use fresh tea leaves to make traditional and modern food and beverages and pick tea fruits and flowers to make reprocessed products. Our products may be tried and purchased in our tea house.

### Is the garden open for visits?

Yes, please contact us to schedule your visit.

Temperature range: -12.6 to 37.7°C

Growing season: May to September

Altitude: 106 m

Average annual rainfall: 800 mm

## Het Zuyderblad

Linda Cebrian-Rampen

*tea maker*

Het Zuyderblad is part of a small farm in the south of Holland. Two tea gardens cover 2.47 acres (1 ha) of the farm, which grows asparagus and strawberries and keeps horses. Since 2014, the gardens have focused on organic farming and creating unique biodiversity. Our teas are handpicked and processed by hand or using small-scale orthodox machinery. We also focus on tea tourism and organise tours, tasting events, lectures, workshops, and dinners on the plantation.

### **What teas do you make, and where can your tea be tried or purchased?**

We specialise in green, black (red), and experimental white tea. Teas can be purchased through our Website.

### **Is the garden open for visits?**

Yes, for activities and tours, please see our Website.

Temperature range: -7 to 25°C

Growing season: April to September

Altitude: 29 m

Humidity: 40 to 70%

Average annual rainfall: 850 mm

---

## Chá Camélia

Nina Gruntkowski and Erika Kobayashi

*tea makers*

Chá Camélia was born from our dream of producing tea in Northern Portugal. We started this adventure in 2011 with 200 tea trees in our garden in Porto. Three years later, they were taken to a farm in Fornelo (Vila do Conde). Today, we have 12,000 plants that occupy 2.47 acres (1 ha) of land, where we use organic principles and a biodynamic spirit. We want to create a sustainable cycle where everything we use on the land comes from the land. Our mission is to produce our own tea and to share our passion for and knowledge of the complex world of tea.

### **What teas do you make, and where can your tea be tried or purchased?**

We specialise in organic green tea. Teas can be tried and purchased on-site or online.

### **Is the garden open for visits?**

Yes, please contact us to schedule your visit. We offer guided tours and personalised degustations.

Temperature range: 2 to 35°C

Growing season: March to October

Altitude: 90 m

Humidity: 80%

Average annual rainfall: 1300 mm

## Tea Scotland

14 members across Scotland

*tea makers*

Tea Scotland is an association of tea growers who have collaborated for over six years to share tea-growing knowledge and promote Scottish tea to the world. Our members span the length and breadth of Scotland: from Orkney to Galloway, Arran to East Lothian, and hence represent a broad range of microclimates and growing conditions.

### What teas do you make, and where can your tea be tried or purchased?

Over the past two years, several members have worked together to produce two teas, using fresh leaves plucked from several tea gardens and processed at The Scottish Tea Factory near Comrie. Teas can be purchased from our Website. Some members also produce single-estate teas.

### Is the garden open for visits?

Some members would be happy to offer guided tours by appointment. Please contact the association for details.

Temperature range: -5 to 30°C

Growing season: April to October

Altitude: 10 to 240 m

Average annual rainfall: 600 to 1800 mm

---

## Windy Hollow

Monica Griesbaum

*tea maker*

Windy Hollow is a 24-acre (10 ha) piece of Perthshire with tea garden and a strong focus on biodiversity and rewilding. Our tea plants grow along and in between basalt rock formations, wild flowers and native broadleaf trees.

### What teas do you make, and where can your tea be tried or purchased?

We produce black tea, white tea and aged tea cakes in small quantities. The teas can be tried and purchased directly from the tea garden.

### Is the garden open for visits?

Yes, only during the growing season (May to August). Please contact us to schedule your visit.

Temperature range: -8 to 25°C

Growing season: May to August

Altitude: 80 m

Humidity: 80%

Average annual rainfall: 700 mm

## Casa del Tè Monte Verità

Tobias and Corinne Denzler

*tea makers*

In 2006, the project "Tea Culture" on Monte Verità was launched as one of the first tea gardens in mainland Europe, with about 1,400 *Camellia sinensis* saplings originating from Italy and Japan. Since 2010, tea plants have been harvested regularly and processed into tea. The tea garden design was inspired by Japanese culture, including a Japanese zen garden, a pavilion, and a Japanese tea house, where different tea specialties can be enjoyed and purchased.

### What teas do you make, and where can your tea be tried or purchased?

We specialise in green, black (red), and white tea. Teas can be tried and purchased on-site.

### Is the garden open for visits?

Yes, for opening hours and guided tours please see our Website. The tea garden is used for educational demonstrations and school tours for the public.

Temperature range: -2 to 34°C

Growing season: April to September

Dormancy length: 6 months

Altitude: 320 m

Humidity: 50 to 80%

Average annual rainfall: 1200 mm

---

## Peterston Tea Estate

Lucy George

*tea maker*

Peterston Tea is a 5-acre (2 ha) tea garden that started in 2015 as a diversification on our fruit farm in South Wales. We first started growing tea from seed in 2014. We are certified organic with the Soil Association and focus on integrating tea production with agroforestry, biodiversity, and sustainability.

### What teas do you make, and where can your tea be tried or purchased?

We specialise in black tea and offer limited quantities of experimental green, oolong, and white tea. We also make a variety of kombucha. Our products can be tried and purchased on-site, online, or from independent retailers.

### Is the garden open for visits?

Yes, please contact us to arrange a visit. We also offer guided tours, open days, and courses on tea growing and processing.

Temperature range: -1.5 to 26°C

Growing season: March to October

Altitude: 60 m

Humidity: 82%

Average annual rainfall: 1150 mm

## Zhornina Tea Plantation

**Maksym Malyhin**

*tea maker*

Zhornina (Red Mountain) Tea Plantation is a 3.5-acre (1.4 ha) piece of the Transcarpathian region. The plantation is part of the remains of a large Soviet experimental agricultural tea station, founded in 1949. The site was abandoned in 2000 and partially rebuilt in 2019. The tea plants are very resilient and have survived frosts of -27°C degrees and are currently organic.

### **What teas do you make, and where can your tea be tried or purchased?**

We specialise in experimental batches of green, dark oolong, and black (red) tea. Currently, we do not sell our tea.

### **Is the garden open for visits?**

Yes, please contact us to schedule your visit. We offer guided tours.

Temperature range: -19 to 33°C

Growing season: May to September

Altitude: 400 m

Humidity: 65 to 85%

Average annual rainfall: 500 mm

As an association, we would like to send our deepest thank you and gratitude to all of the tea masters and tea people from traditional tea-producing countries and cultures who have helped us come this far. We have learned so much from you and your wonderful tea cultures that have existed and are flourishing over hundreds and thousands of years. We thank you for your kindness and sharing your tea knowledge and beautiful teas with us. We look forward to working together in the future.

This is also a much needed opportunity to thank the wonderful Denis Mazerolle, our former president. He worked very hard to establish the association and has been a major part of its steady growth and the gaining of knowledge and friendship among its members. Thank you, Denis, for your thoughtful work, sharing your knowledge and supporting other members with kindness. We wish you and your own tea project all the best and a flourishing future.

Cheers,  
The Tea Grown in Europe Association
